

THE BUILD KIT

The one-page reference for the automation local businesses will pay you a monthly fee to run. A missed call is a lost customer. This kit is the system that saves it.

The system in four moves

1. DETECT	A call goes unanswered. The system waits about 60 seconds in case someone grabs it late.
2. TEXT	It automatically texts the caller a warm, simple message from the business number.
3. LOG	It writes one row to a spreadsheet: time, number, and “texted.” Your proof of work.
4. ALERT	It emails or Slacks the owner so they know a save just happened, in real time.

Build checklist

- Set up a business number in Twilio (a few dollars a month).
- Forward the client's existing line to the new number.
- File the A2P 10DLC registration (business name, address, message type).
- Build the Twilio Studio flow: ring the business, watch the call status.
- On no-answer or busy, fire a webhook to Make.
- In Make: receive the webhook, then send an SMS through Twilio.
- Add a Google Sheets module to log every missed call.
- Add an email or Slack module to alert the owner.
- Test it: call, do not answer, confirm text + row + alert all fire.

Every message must end with “Reply STOP to opt out.” That is required, not optional.

Copy-and-paste message templates

Write once, reuse forever. Swap in the business name and match the tone to the trade.

Plumber / contractor (straightforward)

Hi, this is [Business Name]. Sorry we missed your call! Tell us the issue and your address and we'll get right back to you. Reply STOP to opt out.

Salon / spa (friendly)

Hi! This is [Business Name] — so sorry we missed you! Were you looking to book or reschedule? Text us here and we'll sort it out. Reply STOP to opt out.

Dentist / clinic (reassuring)

Hi, this is [Business Name]. We missed your call but we're here. Reply with what you need and the best time to reach you. Reply STOP to opt out.

Roofer / trades (direct)

Hi, [Business Name] here. Missed your call. Send your address and what's going on and we'll call you back fast. Reply STOP to opt out.

What to charge

Price the outcome, not the hour. One recovered job can be worth \$500 to \$2,000.

One-time setup	\$300 – \$500	Build, configure, register, and test the system.
Monthly retainer	\$100 – \$300 / mo	Keep it running, monitored, and tweaked. This is the whole point.

The pitch

*"You're already paying for marketing to make the phone ring.
I make sure the ring turns into a customer."*

Your assignment this week: Don't build anything yet. Open a map app, pick one trade (plumbers or salons), and call three of them during lunch hour. Count how many go to voicemail. That number is your sales pitch, and you'll have it by tomorrow.

This kit is educational content only. It is not financial, investment, tax, or legal advice. Tool names are referenced for education, not endorsement. Always confirm current messaging regulations (including A2P 10DLC requirements) before sending automated texts, and consider a licensed professional before making money decisions. © MoolahIQ.
